Admission	Free; advance registration is required
Registration	https://www.hotel-tenjikai.jp/tenjikai.php?tid=107

Solutions at the Innovista Exhibition Booth

1. Bath Salt Experience Service

A special bath salt experience booth will present a new experiential amenity designed to further improve guest satisfaction. Guests can enjoy creating their own bath salt, producing a memorable activity for women, children, and families.

The experience is designed not only as an amenity offering but also as a travel memory that guests may want to share through photos, video, and social media.

2. Ultra-Fast Freezing Technology Solution

This solution addresses labor shortages, food loss, and operational efficiency. A tasting demonstration will let visitors experience foods prepared using ultra-fast freezing technology.

3. Neo Linen

A non-iron linen solution designed to address linen supply challenges will be displayed in a fully made-up bed setting.

A seminar titled 'A Proposal for Solving Linen Supply Challenges' will also be held at the venue from 15:45 on the same day. We welcome your participation.

4. fromG-Hand

This proven automated hand-towel service has many installations. Its thick hand towels have also obtained FSC certification.

Visitors can evaluate the feel of the new thick towels and learn about the complimentary service proposal.

5. VAGO Vacuum Compression Solution

A practical solution for travelers facing overpacking challenges.

"My travel belongings will not fit in my suitcase..." "I bought too many souvenirs, and packing for the trip home is difficult..."

VAGO solves these concerns with a compact, remarkably light body and powerful vacuum compression. It easily compresses bulky clothing and helps travelers use suitcase space more efficiently.

We look forward to welcoming hotel industry professionals to the exhibition.
